

ITEM 0107401

TRAFFIC CONES

DESCRIPTION

Under this item, the Contractor shall furnish all reflectorized orange traffic cones required on the Project. The cones shall conform to the requirements stated on the plans and shall be placed as directed by the Engineer.

REFERENCED ITEMS

None

REQUIRED SUBMITTALS

Material Certificate of Compliance:

Submit 5 copies of material certificate of compliance for traffic cones in accordance with the contract general requirements.

MATERIALS

Traffic cones shall be constructed of various materials and thickness to withstand impact without damage to cones or to vehicles. The traffic cones shall be sufficient weight or have bases to which ballast may be added to assure that they will not be blown over or displaced by wind from passing vehicles.

CONSTRUCTION METHODS

The Contractor shall have available on the project, a sufficient number of traffic cones to protect vehicular and pedestrian traffic during construction procedures. The cones shall be placed on exposed utility valve boxes which are not adequately protected by ramping around the valve boxes with processed stone, on exposed catch basin tops, along excavations, or wherever else they are ordered by the Engineer. All cones deemed by the Engineer to be damaged beyond practical use shall be replaced. Cones deemed inadequate by the Engineer or not meeting these specifications will not be allowed.

METHOD OF MEASUREMENT

Measurement for Traffic Cones shall be by the number of each (EA) Traffic Cone furnished and accepted. Measurement will be made only once for each traffic cone

furnished regardless of the length of time, adjustment, or relocation necessary to complete the work

BASIS OF PAYMENT

This work shall be paid for by the number of each (EA) "TRAFFIC CONES" furnished. All labor, tools, material and equipment required for this item shall be included in the unit price.
