CONSTRUCTION METHODS

The Engineer will direct the Contractor as to when, how many and where private duty Police Officers will be hired and used on the job. The Contractor may recommend and ask approval of the Engineer for the use of Police Officers based on his contemplated activities. Upon determination by the Engineer that Police services are warranted, the Contractor shall contact the Hartford Police Department for ordering private duty Police Officers. The Engineer will acknowledge Police Officer's presence on the job by signing a job slip provided by the Officer. The Contractor shall promptly pay the Police Department when billed for those services.

The City will reimburse the Contractor for the services of private duty Police Officers upon receipt of paid invoices or cancelled checks. The Contractor may hire police for his private operations but the City will not pay for these Officers. The services of a Hartford private duty Police Officer include only the Officer; no vehicle or associated equipment is included with the Officer, who arrives at the work site by his own means.

METHOD OF MEASUREMENT

Services of Traffic Police Officers will be measured for payment by the number of hours for each officer rendering services in accordance with the orders of the Engineer; this is to include however, only Police Officers as are on duty within the limits of construction, within the right-of-way for the project, upon detours stipulated in the contract, or upon detours ordered by the Engineer. Police Officers hired by the Contractor for continued use beyond the period for which the Engineer deems such Police Officers are necessary to the proper completion of the project, or at locations where traffic is unnecessarily restricted by the Contractor's method of operation, will not be measured for payment.

The minimum hours of payment for any one Police Officer in any one day shall be eight hours. No Police Officer shall work more than ten hours in any one day. In case such services are required for more than ten hours, the Contractor shall order additional Police Officers.

BASIS OF PAYMENT

Police Officers will be paid for at the rate per hour for "TRAFFIC POLICE OFFICER" as billed by the Police Department of the City of Hartford, which price shall include all sales/use taxes, fringe benefits and administrative charges. No other miscellaneous expenses shall be included in the bill. The contract price for this item will be a allowance determined by the engineer. Payments will be made to the Contractor for only the actual amounts he pays to the Police Department for its billings for services as described above. These amounts will be applied against the allowance provided in the contract.
