REQUIRED SUBMITTALS

None

MATERIALS

All concrete materials for this work shall conform to the requirements of Section M.03 of the State of Connecticut, Department of Transportation, Standard Specifications for Roads, Bridges and Incidental Construction, Form 816, 2004, for Class "A" concrete.

CONSTRUCTION METHODS

The existing chain link posts shall be cleaned of any existing concrete and set in new concrete footing. The concrete footings shall encase the post and shall be 42" deep, at least six inches larger in diameter at the bottom of the post than at the ground level. The top of the footing shall be pitched slightly above the ground to prevent water from standing around the post. The concrete shall be placed on and against undisturbed earth. The posts shall be set six inches (6") above the bottom of the concrete footing.

1. INSTALLATION

Installation shall be done in a neat and workmanlike manner and shall conform to the standards as set forth by the chain link fence Manufacturer's Institute. Should any damage to the existing fence components occur that is a result of the contractors negligence, as determined by the engineer, the contractor shall replace these components at no cost to the City.

2. **CLEAN UP**

Upon the completion of the re-installation, all the debris created by the re-installation shall be removed and the premises left clean.

3. **LAWN REPAIR**

Any damage to the lawn areas as a result of the reconstruction of the chain link fence shall be repaired by grading and seeding by the Contractor to the satisfaction of the Engineer, and the cost of the lawn repair shall be included in the cost of this item.

METHODS OF MEASUREMENT

This work will be measured for payment by the number of linear feet of chain link fence reset and accepted.

BASIS OF PAYMENT

This work will be paid for by the contract unit price per linear foot of "RELOCATE CHAIN LINK FENCE" reset and accepted, including all equipment, tools, labor, and incidental expenses thereto.
